International Journal of Electrical Engineering and Computing

Dear readers,

Welcome to the first issue, Volume 7, of the International Journal of Electrical Engineering and Computing (IJEEC).

The International Journal of Electrical Engineering and Computing (IJEEC) is a recently established journal published by the Faculty of Electrical Engineering at the University of East Sarajevo, Bosnia and Herzegovina, and the publishing, design and marketing company Academic Mind from Belgrade, Serbia.

The Journal has been created to promote the academic, professional community and research development visibility, and the propagation of original and relevant articles in the wide range of subfields related to electrical engineering and computing.

The papers reporting and containing original theoretical and/or practice-oriented research and articles of interdisciplinary nature are all welcome. Submissions may include original research papers, review papers, case studies and short reports. Each paper is reviewed by at least two independent reviewers, with a compulsory and guaranteed anonymity of both authors and reviewers.

The International Journal of Electrical Engineering and Computing (IJEEC) is published electronically, in English. High quality, refereed papers are published twice a year, in June and December. Full texts of all articles published in the Journal are free of charge and their reading and downloading is possible free of charge, without any kind of restriction.

Volume 7, Issue 1 of the Journal includes six papers. All of them were presented at the XXII International Symposium INFOTEH–JAHORINA 2023 and selected for publication in the Journal. All the papers are expanded for publication in the Journal. On behalf of the Editorial Board, I would like to express our gratefulness to the authors of papers and to acknowledge generous help which both the authors and editors obtained from the peer-reviewers.

We will do our best and strive to provide the quality of Journal with every new issue, and to establish and maintain its reputation in the professional and academic community.

Editor

Danijel Mijić, PhD
